SUMMARY

We are delighted to bring to you the August 2023 edition of the Statfreaks Bulletin. Consider it your authoritative guide for the most up-to-date and compelling insights in the realm of statistical analysis for horse and greyhound racing.

In this month's issue, we have curated a selection of recent news from the ever-evolving Statfreaks universe. We've devoted time to answer several inquiries, particularly regarding horses that start at short prices, and have performed a comparative analysis between Betfair POT% and Fixed win POT%. We've also delved into examining the predicted settling positions at prominent racing venues like Moonee Valley and Rosehill Gardens.

An early sneak peek into the Race Targeting update for our cutting-edge RAPRO system is included in the edition. We've also revisited our Rider/Trainer and Combo tracking system from last month, providing the latest developments and findings.

Furthermore, we have delved deeper into the examination of Lay Opportunities involving Favourites. We also deliver a comprehensive analysis of the Top Performing Horses and Greyhounds of 2023.

We hope you will find this wealth of information around horse and greyhound racing statistics not just informative, but truly enjoyable and useful in your journey with us.

Happy Reading and Racing!

LATEST NEWS

Throughout the month of August, our team is hitting the ground running as we gear up for the pulse-pounding excitement of the spring racing carnival.

This year, we're diving headfirst into a treasure trove of data, analysing the twists and turns of carnival races at key venues, and unpacking the secret recipes behind the stellar performances of riders and trainers during the big events.

Meanwhile, our social media gurus are cranking up their creativity to eleven. They're set on a mission to post insightful content, ensuring that no day goes by without a sprinkle of fresh knowledge for our ever-growing band of followers.

We're stoked to announce that our trusty RAPRO database platform has received a turbo boost. The Statfreaks module now sports an uber-cool feature allowing users to conduct targeted race analysis using advanced filters, all tied neatly with a direct link to the form function.

And for all you Greyhound fans out there, hold onto your hats! We've got upgrades under the hood and we're stoked about some major bells and whistles we plan to roll out in the near future. Stay tuned for the fun to unfold!

Regards,

The Statfreaks Team

QUESTIONS & ANSWERS

What is the winning frequency of horses that start with a price around or below \$2.5 and overlap with data from statfreaks?

An initial study has revealed some intriguing findings. Notably, the anticipated settling position for racers starting at a low price in the market (\$2.5 or under) catches our eye. The statistics show that when our statfreaks data predicts these runners will settle between positions 4 and 6 and start within this low-price bracket, they tend to win half the time, based on data from 2023.

When we dissect these statistics using our PR2 (projected position at the 200m mark), we note a win rate of 50% and a slight historical advantage when using the betfair win sp.

QUESTIONS & ANSWERS

What is the typical disparity in POT% between the Betfair Win Starting SP and the Average Win Fixed Closing Price for Favorites?

By focusing on Favorites, we can examine the Profit on Turnover totals relative to both the Betfair Starting SP and the Average Win Fixed Closing Price. The information suggests that the Betfair SP (with commission included) yields a superior POT% (more favourable pricing) compared to a closing fixed win price. This pattern holds true across all months and all regions within Australia.

Have a question?: www.statfreaks.com.au/contact/

QUESTIONS & ANSWERS

What are the win strike rates and POT% for **Moonee Valley** when Statfreaks predicts a horse to be in the top 4 settle positions?

Breaking down the analysis into three categories enables us to gain deeper insights into how the predicted settling position variable from Statfreaks is functioning across strike rates and historical Profit on Turnover (POT%).

By applying filters to consider only races with a minimum field size of eight or more, and focusing solely on data from 100% quality races, we have initially segmented the data points by field size. The highest strike rates and positive historical POT% tend to occur in field sizes of 8 to 9.

Upon grouping by barrier numbers, the highest strike rate is found within the groups 1 to 3. However, the greater POT% is detected with runners situated between barriers 4 and 7. This suggests that the market is shortening the odds for many runners starting in positions 1-3, which subsequently creates better value for positions 4-7, despite a lower strike rate.

The strike rate shows little variation across different distances, though a larger disparity exists between sprint versus middle and staying races. The data may imply that in sprint races, runners meeting this criteria are bet on more heavily than those in middle and staying distance races.

QUESTIONS & ANSWERS

What are the win strike rates and POT% for **Rosehill** when Statfreaks predicts a horse to be in the top 4 settle positions?

Query Conditions

- DQ is equal to 100
- Country is equal to AU
- Track Name starts with Rosehill
- Starters.Final is greater than or equal to 8

Performing the same analysis for Rosehill yields distinctly different results. The highest strike rates generally occur in field sizes of 8 to 10.

When divided into barrier groups, the highest strike rate is found within groups 1 to 3, which also results in a historically positive POT%.

Like Moonee Valley, the strike rate exhibits little variation across different distances, and the POT% is considerably lower in SPRINT races, which also have the lowest strike rate of 11%.

It's clear from the analysis that Moonee Valley presents a much more favourable profile for horses predicted to settle in the top 4, compared to Rosehill.

JOCKEY/TRAINER REVIEW PROCESS

At the end of each month, we identify the top jockeys and trainers based on our detailed data analysis. These are individuals who have consistently demonstrated exceptional strike rate performance and contributed to profitable outcomes when ranked high on our statfreaks ratings. Instead of just acknowledging their performance for the previous month, we add them to our watchlist for the coming months. When a rider/trainer has dropped out of market performance for more than 3 months rolling, they are removed from the tracking table.

Every **month**, we'll revisit these top performers in a dedicated edition of our newsletter. We will re-analyze their performance during this period, looking at their wins, losses, and overall profitability using the Betfair Starting Price. This approach will help us understand the longer-term patterns and consistency of these high achievers, providing you with a more holistic view of their performance. We believe this system can provide an extra edge over the market.

The following sections will present the completed analysis for July 2023 and provide an update on the tracking table system.

JOCKEY'S (AUD)

The below table display's riders that had a win strike rate equal or **above 33%** when **ranked 1** (Top in race) on our Statfreaks AI ratings and returned a positive profit on turnover for July 2023.

These riders combined with Statfreaks AI data have outperformed market expectations and **were profitable for July 2023.**

July 2023

Throughout the month of July 2023, these jockeys have successfully secured rides that have proven to be extremely advantageous in the races they have participated in. Therefore, it is recommended to prioritize and consider each of their rides when they are ranked as the top contenders in a race based on statfreaks ratings. Additionally, it is important to assess whether any prevailing conditions on the race day further reinforce the selection, enhancing the potential for a favorable investment.

It is of utmost importance to consistently monitor the performance of these trainers over time, as their results can be influenced by various factors such as the season and the specific horses they have in their care. Additionally, it is crucial to thoroughly evaluate any runner trained by these trainers that ranks as the top contender in a race. Considering the dynamic nature of racing conditions on the day and gathering additional insights from the mounting yard, such assessments will significantly contribute to identifying a solid advantage over the market.

These combinations have displayed impressive performance when ranked as the best in a race according to our statfreaks rating, boasting a high success rate in both winning and placing. It is essential to monitor these pairings closely when they are top-rated in a race based on statfreaks data. Additionally, assessing the runner's adaptability to any altering conditions on the day of the race will be crucial, as it could potentially offer a significant market advantage.

LAY BETTING – BETFAIR

Welcome to lay betting, a unique betting strategy on Betfair. Unlike traditional betting where you bet on an outcome to happen, lay betting allows you to bet against an outcome.

In horse racing, when you lay a horse, you're betting it won't win. If any other horse wins, your bet wins. If the horse you laid wins, your bet loses. Essentially, you're acting as the bookmaker.

The odds in lay betting are reverse of traditional betting. For example, if you lay a horse at odds of 4.0 with a \$10 stake, you'll win \$10 if the horse loses. However, if the horse wins, you'll have to pay out \$30. The liability (the amount you could lose) in lay betting can often be more than the amount you stand to win.

In essence, lay betting allows you to profit not only from picking winners, but also from picking losers. It's a valuable tool that, once mastered, can significantly broaden your betting strategy.

LAY BETTING – FAVOURITES ANALYSIS

We've conducted additional research on lay betting, utilizing data from Betfair, and have identified several racecourses where lay bets have historically yielded profits. Our most successful strategy targeted races where our predicted settling position (SET) ranged from 7th to 11th, and the total number of runners in a race was between 4 and 11. This approach demonstrated the most promising outcomes when the barrier rating/rank (BR) was set to 2 or more.

The screenshot displays a query builder interface with the following components:

- Objects and their attributes:** A tree view showing the 'lay' object and its various attributes, including 'Avg BF Win Lay SP', 'BF WinSP Units Lay Inv (Flat)', and 'BF WinSP Lay POT% (Stake)'.
- Query Columns:** A list of columns to be included in the query, such as 'Track Name', 'Win Strike', 'Place Strike', 'Count', and 'BF WinSP Lay POT% (Flat)'.
- Query Conditions:** A list of filters to be applied, including 'Betfair WinSP (True Odds) is greater than or equal to 1.01', 'DQ is equal to 100', 'SP Rank is equal to 1', 'SETPOS is between 7 and 11', 'BR is greater than or equal to 2', and 'Starters Final is between 4 and 11'.
- Result Set:** A table showing the results of the query, with columns for Track Name, Win Strike, Place Strike, Count, BF WinSP Lay POT% (Flat), and BF WinSP Lay POT% (Stake).

OUR METHODOLOGY

Harnessing the Power of the Racing Analytics Expert Form Database Platform.

Our examination of horse racing data is anchored by the Racing Analytics - Expert Form platform, the Statfreaks plugin, and Betfair's rich historical data.

The Racing Analytics platform is our primary tool for investigating the vast array of data from various races. With it, we scrutinize the performance histories of horses, jockeys, and trainers, and dissect diverse variables.

Statfreaks amplifies our analysis, providing advanced statistical capabilities for pattern recognition and predictive modeling. Betfair's historical data offers a broad base for our exploration, contributing a wealth of information.

For those keen on conducting personal research, the platform is accessible via subscription at www.rapro.com.au. Here, you can engage directly with the same data environment we utilize for our analysis and discover your own unique insights.
