DISCLAIMER

Please note that the information provided in this newsletter regarding historical profit/losses from racing investments is for informational purposes only. It should not be considered as financial or investment advice.

Investing on horse and greyhound racing involves a degree of risk, and past performance is not necessarily indicative of future results. The outcomes of horse races are subject to various factors and uncertainties that can influence the results.

We strongly encourage all readers to exercise caution and to bet responsibly. Set a budget for your betting activities and only wager amounts that you can afford to lose.

Gambling can be addictive, and if you or someone you know is struggling with gambling-related issues, we recommend seeking professional help or contacting relevant support organizations.

By accessing and using the information in this newsletter, you acknowledge that you understand the risks associated with gambling and that you assume full responsibility for any actions you take based on the information provided.

All pages and content within this newsletter are explicitly 18+ only. Gamble Responsibly. Visit www.gamblinghelponline.org.au or call Gambling Help on 1800 858 858.

SUMMARY

We're thrilled to present the September 2023 edition of the Statfreaks Bulletin, your definitive source for the latest and most engaging insights in statistical analysis for horse and greyhound racing. Think of this bulletin as your comprehensive guide to the industry's intricacies.

In this issue, we address a key question submitted from our member base, concerning the conversion and calculation of our ratings and historical strike rates into market prices. Additionally, we offer updates on the evolving rider/trainer combo tracking system, a feature we've been enhancing monthly. We've also completed a variety of analytical models worth diving into, using Statfreaks data. These models cover leading jockeys, favourites, and frequent rider/horse pairings. Furthermore, we spotlight specific trainer models and offer updates on top-performing horses and greyhounds based on our predictive analytics.

We're certain that this abundant assortment of horse and greyhound racing statistics will offer not just enlightenment but also real enjoyment and practical value as you continue your engagement with us.

Happy Reading and Racing!

David Vitali
CEO

LATEST NEWS

Throughout the month of September, our dedicated team has been diligently focusing on several key initiatives designed to elevate our brand and service offerings. Notably, we have been amplifying our social media footprint, executing tailor-made projects for our esteemed clients, and enriching the functionalities of both the RAPRO Statfreaks and Expert Form modules.

We had the pleasure of collaborating with Vince Accardi from Daily Sectionals to finalize a set of sophisticated enhancements that will soon be integrated into the RAPRO IVR module. These upgrades will address various dimensions including race speed profiles, benchmarking analytics, sectional data, and form functionality.

Furthermore, we've been consistently engaged in rigorous in-house analysis as part of our commitment to continuous improvement. Our aim is to unveil additional enhancements to our products and services in the near future. We are also actively working on expanding our suite of virtual tables for both horse and greyhound racing on our website, solidifying our position as an industry leader.

- Past performance is not an indicator for future performance.
- Further insights can be accessed via www.rapro.com.au database platform and www.statfreaks.com.au

QUESTIONS & ANSWERS

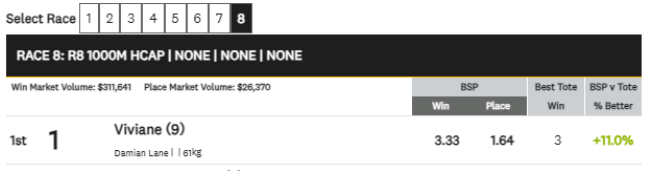
How to create a rated market price from the statfreaks rating?

We like to work with two approaches when creating market prices. The first approach derives prices based on historical strike rates using a well-established statistical model. The second approach employs the RAPRO Pricing module to automatically determine a final price based on the Statfreaks Rating value.

To give you an example of how we translate historical win strike rates into a rated price, consider the following:

- A horse has a historical 50%-win strike rate at a specific track.
- Using this information, we calculate a rated price of $2.0 (100/50).
- In a specific case, the market priced Viviane at approximately $3.0 to win.
- This means there's a $1 edge ($3 - $2).
- Additionally, Viviane received a high score on our SFR rating system.

DATE	TRACK	RACE	NO	NAME	SFR	RK	RKT	JR	TR	RUN_TRK	WTRK_SR
06/09/2023	Sandown Hillside	8	1	Viviane	5.6	1	2	1	5	4	50%



Numerous members actively monitor the SFR's performance either manually or through the RAPRO Statfreaks module. They use this data to construct their own historical models, which include known strike rates. These strike rates are then converted into market prices using the method described earlier. Based on this information, members identify forthcoming races that meet their specific criteria and then tailor their investment strategies accordingly.

Keep reading onto the next page for the second approach…

HAVE A QUESTION?: WWW.STATFREAKS.COM.AU/CONTACT/

QUESTIONS & ANSWERS

The second approach…

The RAPRO Pricing module has the capability to assign a price to a race based on the SFR value. For instance, in the example provided, we adjusted the market to 100% and used the SFR along with the SFR values for the other runners in the race. This resulted in the algorithm generating a price of $2.02 for a 49.54%-win probability. We spotted an approximate edge of $1.21, making the investment a wise one, especially since Viviane won the race.

Our recommended strategy involves using RAPRO to determine prices and then meticulously tracking our investments. This dual approach allows us to calibrate the sensitivity of the auto-pricing module effectively and maintain a competitive edge in the marketplace, even as we actively assess races.

STRIKE RATE ANALYSIS MODELS

TOP RIDERS - LEADING

We've developed an analysis that focuses on our forecasted leading variables, organized by jockeys and based on data from 2023. The analysis offers three different variations, identifying jockeys who have shown strong performance when riding a horse that is predicted to take the lead (with a SETPOS value of 1) according to our Statfreaks AI-generated predictions.

RACING ANALYTICS EXPERT FORM – MAP PROFILING

By utilizing advanced statistics, the RAPRO Expert Form Module assists you in refining your speed map. It helps you pinpoint crucial attributes of both riders and horses. For example, you can determine how well a horse performs when jumping from a specific barrier group, identify its ideal settling positions, and then align these findings with the conditions under which the rider excels.

In this analysis, we employed a sub-query to sift through the historical data of all runners who have **been top-ranked in a race**. The sub-query is designed to filter and return only those horses that have participated in races during the current season, from August 1st, 2023, to the present.

Below is the list.

GREYHOUNDS– TOP PERFORMERS - 2023

Here's the latest update of greyhounds that have shown strong performance when projected to be among our top 4 ranked runners in a race.

It may be worthwhile to include these runners in your watchlist. Whenever they are scheduled to race, verify whether they appear in our top 4 rankings. If they do, and the market conditions seem favourable, you could potentially leverage a significant advantage.

Filters:

- Data Quality = 100
- Ranked In Top 4 of race
- Year 2023.

***Important note:**

- Past performance is not an indicator for future performance.
- Any runner that meets this shortlist, we highly recommend conducting additional form analysis.

Discover the power of our Greyhound Racing | Statfreaks service and unlock valuable insights by signing up now!

JOCKEY/TRAINER REVIEW PROCESS

At the end of each month, we identify the top jockeys and trainers based on our detailed data analysis. These are individuals who have consistently demonstrated exceptional strike rate performance and contributed to profitable outcomes when ranked high on our statfreaks ratings. When a rider/trainer or combo has dropped out of market performance for more than 3 months rolling, they are removed from the tracking table.

Every **month**, we'll revisit these top performers in a dedicated edition of our newsletter. We will re-analyze their performance during this period, looking at their wins, losses, and overall profitability using the Betfair Starting Price. This approach will help us understand the longer-term patterns and consistency of these high achievers, providing you with a more holistic view of their performance. We believe this system can provide an extra edge over the market.

The following sections will present the completed analysis for the past 3 months rolling and provide an update on the tracking table system.

JOCKEY'S (AUD)

The below table display's riders that had a win strike rate equal or above 33% when ranked 1 (Top in race) on our Statfreaks AI ratings and returned a positive profit on turnover over the past 3-months rolling.

These riders combined with Statfreaks AI data have outperformed market expectations.

STATFREAKS TRACKING TABLE

TRACKING	JOCKEY	May-23	Jun-23	Jul-23	Aug-23	AVG 3-MONTH STRIKE

STATFREAKS RATING RACE RANK = 1

RED STAR RATED

TOP PERFORMANING RIDERS

Responding to member input, we've revised the method for monitoring rides that demonstrate a three-month profit on turnover (POT%). In the initial week of each month, the tracking table will be refreshed to reflect current data on riders, trainers, and their combinations. If a rider's three-month rolling performance dips below a 33% strike rate, they will be removed from the tracking table.

*__Important note:__

- the Betfair Profit on Turnover "POT%" and Profit & Loss "P/L" calculation includes commissions deducted.
- Past performance is not an indicator for future performance.
- Further insights can be accessed via www.rapro.com.au database platform.

Green	33% or above
Yellow	20% to 32%
Red	Below 20%
Red	Must have 5 minimum rides meeting SFR critera over 3 period
	Only Positive POT% riders displayed.

TRAINERS'S (AUD)

The below table display's riders that had a win strike rate equal or above 33% when ranked 1 (Top in race) on our Statfreaks AI ratings and returned a positive profit on turnover over the past 3-months rolling.

These trainers combined with Statfreaks AI data have outperformed market expectations.

STATFREAKS RATING RACE RANK = 1

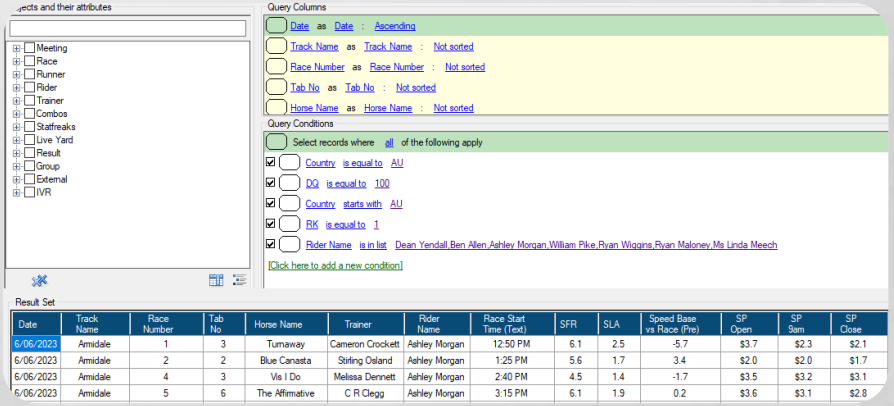
Virtual Statfreaks Data Table



Racing Analytics Expert Form Analyser

OUR METHODOLGY

Harnessing the Power of the Racing Analytics Expert Form Database Platform.

Our examination of horse racing data is anchored by the Racing Analytics - Expert Form platform, the Statfreaks plugin, and Betfair's rich historical data.

The Racing Analytics platform is our primary tool for investigating the vast array of data from various races. With it, we scrutinize the performance histories of horses, jockeys, and trainers, and dissect diverse variables.

Statfreaks amplifies our analysis, providing advanced statistical capabilities for pattern recognition and predictive modeling. Betfair's historical data offers a broad base for our exploration, contributing a wealth of information.

For those keen on conducting personal research, the platform is accessible via subscription at www.rapro.com.au. Here, you can engage directly with the same data environment we utilize for our analysis and discover your own unique insights.
