STATFREAKS HORSE RATINGS

SFR: StatFreaks Rating

The StatFreaks Rating (SFR) includes over 100 variables, each carefully adjusted over years to reflect their significance in predicting a race's outcome.

Our sophisticated algorithms dynamically modify these weights based on continual data analysis and learning, ensuring the rating evolves with fresh insights.

SLB: SFR Lengths Behind

- The SFR Lengths Behind (SLB) metric measures the rating lengths a runner is behind the leader, helping to pinpoint standout performers in a race. Runners with an RK of 1 and an SLB greater than +1.5 typically show strong performance.

RK: Race Rank

- This ranks a runner's SFR within all competitors in a specific race, offering a comparative perspective of their potential performance.

RKT: Track Rank

- Track Rank (RKT) evaluates a runner's SFR against all participants in a meeting, identifying those with the highest potential for success based on their rankings for the day.

6.1+ RATED – AVG SP VS BF

Many clients ask us where to find the best prices in the market and how to utilize the available price data effectively. Our standard advice is to analyse the data. Below is an example of a straightforward query on our 6.1+ rated runners with a filter on PR2 = 1 for good tracks from 2023 to the present.

The data clearly shows that using the average fixed win price results in a poorer return compared to simply taking the Betfair WinSP (with commission already factored into the POT%). Therefore, based on the data, our recommendation is to use the Betfair exchange.

LAY BETTING – BETFAIR

Welcome to lay betting, a unique betting strategy available on Betfair. Unlike traditional betting where you bet on an outcome to happen, lay betting allows you to bet against an outcome.

In horse racing, when you lay a horse, you're betting it won't win. If any other horse wins, your bet wins. If the horse you laid wins, your bet loses. Essentially, you're acting as the bookmaker.

The odds in lay betting are reverse of traditional betting. For example, if you lay a horse at odds of 4.0 with a \$10 stake, you'll win \$10 if the horse loses. However, if the horse wins, you'll have to pay out \$30. The liability (the amount you could lose) in lay betting can often be more than the amount you stand to win.

In essence, lay betting is a valuable tool that, once mastered, can significantly broaden your betting strategy.

James McDonald:

- Win Strike Rate: 39%
- Place Strike Rate: 48%
- Count: 31 rides

James McDonald demonstrates a strong win strike rate and profitability, with a win POT% of 46.8%. However, his place POT% is negative, indicating that while he excels in winning, his market performance in place bets is less favourable.

Angela Jones:

- Win Strike Rate: 28%
- Place Strike Rate: 51%
- Count: 80 rides

Angela Jones shows good profitability in win bets with a POT% of 26.8%, while her place bets have a slightly negative return. Her high number of rides and solid win strike rate make her a reliable choice for win betting.

Leslie Tilley:

- Win Strike Rate: 27%
- Place Strike Rate: 36%
- Count: 11 rides

Leslie Tilley shows a significant win POT% of 37.3%, indicating strong profitability in win bets. However, as the place POT% is negative, like James McDonald, suggesting this rider's positive return on investment lies more in winning races rather than placing.

Conclusion:

The analysis highlights that while these top riders show strong win strike rates and profitability in win bets, their place bets tend to be less favourable. When considering the broader data, Betfair returns generally offer higher profitability, particularly in win bets. For instance, Michael Cahill's Betfair WinSP POT% is an outstanding 337.0%, emphasizing the potential advantage of using Betfair for betting on top-performing riders. This trend reinforces the value of Betfair as a platform for maximizing returns, particularly for win bets
